Professional Summary

SharePoint Developer experienced in delivering enterprise business applications across Microsoft 365. Hands-on with SharePoint Framework (SPFx), React, TypeScript, SharePoint Online, Power Automate, Power Apps, and Microsoft Graph. Skilled in translating business requirements into maintainable applications, integrating Microsoft 365 services, automating workflows, and building reusable, responsive user interfaces.

Professional Experience

Microlink Infrastructure Management Pvt. Ltd. Mumbai, India
SharePoint Developer Feb 2025 – Present

- Design and maintain enterprise SharePoint Online applications using SPFx, React, and TypeScript for scalable business solutions.
- Build custom SPFx web parts, extensions, reusable components, and responsive dashboards for diverse business workflows.
- Develop Power Automate flows for approval routing, email notifications, conditional logic, and dynamic SharePoint list updates.
- Build custom Power Apps and create Microsoft 365 Copilot agents to automate contextual document discovery and enterprise support.
- Integrate SharePoint data with REST API, PnP JS, CAML queries, and Microsoft Graph API to connect the Microsoft 365 ecosystem.
- Implement client-side validation, role-based access control, and workflow tracking to enhance data quality and user experience.
- Manage solution packaging, deployment via the SharePoint App Catalog, and continuous application troubleshooting.
- Collaborate with stakeholders to clarify requirements, refine existing solutions, and deliver maintainable enhancements.

Refread Remote
Front-End Developer Jul 2024 – Oct 2024

- Developed reusable Angular components using TypeScript and RxJS to support consistent UI patterns and maintainable features.
- Integrated REST APIs and optimized data-fetching and caching approaches to support responsive application experiences.
- Enhanced user interfaces alongside design stakeholders, focusing on usability, cross-device consistency, and engagement.
- Applied ESLint/Prettier conventions and led code reviews to improve overall codebase quality and reduce production bugs.

Thor Solutions Hybrid
Front-End Developer Oct 2023 – May 2024

- Built responsive, high-performance web interfaces utilizing React.js, TypeScript, and Tailwind CSS.
- Collaborated with UI/UX teams to implement user-centered layouts and deploy consistent, reusable component libraries.
- Improved frontend load times through image optimization, lazy loading, and Webpack bundle splitting.
- Participated in Agile/Scrum ceremonies, including daily stand-ups, sprint planning, and iterative retrospectives.

Technical Skills

SharePoint & Microsoft 365: SharePoint Online, SPFx Web Parts & Extensions, REST API, PnP JS, CAML Queries, App Catalog
Power Platform & AI: Power Automate, Power Apps, Microsoft 365 Copilot agent creation, automated workflow routing
Frontend Development: React.js, TypeScript, JavaScript (ES6+), Angular, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap
APIs & Integration: Microsoft Graph API, RESTful APIs, JSON, Outlook, Teams, OneDrive integration
Libraries & State Management: React Hooks, Context API, RxJS
Tools & Practices: Git, GitHub, VS Code, npm, Webpack, ESLint, Prettier, Agile/Scrum, CI/CD, Code Reviews
Other Technologies: Python, Node.js, Firebase, Supabase, MongoDB, SQL

Education

Bachelor of Technology (B.Tech), Electronics and Communication Engineering 2023
NSUT East Campus (formerly AIACTR), New Delhi GPA: 8.3/10.0

Higher Secondary Certificate (12th Grade) 2019
SBBM Govt. Sarvodaya Vidyalaya, New Delhi GPA: 7.2/10.0
